### FLANNERY

# Wizard of Oz Bridge System

Flannery 2  $\diamond$  opening shows 11<sup>+</sup>-15 HCP, five or six hearts, four spades and three or four cards in minors. Opening 1  $\diamond$  then rebidding 2  $\diamond$  with honors in the long suits, reasonably good 6 hearts and 15 or even 14<sup>+</sup> HCP is the choice.

Responder can ask key cards for the minor with 4m or 4NT for hearts over 3M responses.

#### **ADVANTAGES OF FLANNERY**

If you play Flannery,  $1 \Leftrightarrow$  response to  $1 \clubsuit$  shows 5 cards and  $2 \blacklozenge$  rebid is reverse after  $1 \clubsuit$  opening. You lose weak  $2 \blacklozenge$  opening if you play Flannery, but you can still have good results by opening  $3 \clubsuit$  with a reasonably good 6-card suit when you are non-vulnerable. Flannery  $2 \blacklozenge$  opening is a convention that completes the Two Over One system. It's especially useful for sequences after  $1 \clubsuit$  opening.

- \* Since we open 2 + with 12-15 HCP and open 1 and rebid 2 with better hands, we won't have any rebid problem after 1NT response over 1 opening.
  \* 1 over 1 shows 5-card suit, which is very useful because opener can support his partner with
- \* 1 over 1 shows 5-card suit, which is very useful because opener can support his partner with 3-card fit and responder knows that opener doesn't have 3-card fit when he doesn't raise. As a result, responder does not need to make any attempt to find out if partner has 3-card fit.
- \* Opener has a great advantage in knowing that his partner has 5-card spade suit with his 1 + bid over 1, since he can confidently support spades with three cards.
- \* Bidding 1NT with four spades allows you to avoid problems that could arise in further bidding.
- \* After INT response, you can bid the other minor to play over opener's 2m rebid or bid 2 to show that you have a good fit to the minor.
- \* It's easier to show your strength after this point by bidding a new suit, 2NT, 3NT, or supporting partner's first or second suit.
- \* With 1NT response, you don't give any extra information to opponents while reaching the final contract, since you know that partner doesn't have a 4-card spade suit.
- \* You may reach 2NT or 3NT contracts after 1NT response and may get a favorable spade lead.
- \* When opener rebids 2 with a strong hand, you are most likely to play the contract from right side.
- \* After 1NT response to 1 vopening, it will be much riskier for the opponents to balance if you reach a 2-level contract.
